

Case Study: North Glasgow College. **Location: Springburn, Glasgow.**

North Glasgow College

North Glasgow College appointed Greenroom IKM to design its new £26 million facility in the Springburn area of the city. The project was opened by Princes Anne in 2009.

The 16,900m² development will be home to a state-of-the-art resource centre, conference facilities and a fully equipped sports hall, providing a new social heart for the College campus for both students and the surrounding community. A complex building serving the needs of its versatile students and teaching facilities; from standard computer labs to acoustic music rooms, disabled learning centres to car workshops.

Our practice was commissioned to provide a full building services design via the variable concepts incorporating environmental control BMS and intelligent lighting controls.

Location
